

Diversity E-Library Reference Resource

As part of the Diversity committee's goal to promote diversity issues and research within the division, a subcommittee of the SPP Diversity SIG has compiled a non-exhaustive list of resources to help advance clinical practice and research to promote better health outcomes among diverse populations. These resources include research on a broad range of diversity issues among various pediatric chronic illnesses and other vulnerable populations. Resources are also provided to help facilitate the mentoring of individuals from diverse backgrounds.

We hope that you will find these resources helpful and also invite you to share additional resources that expand and enhance cultural sensitivity and competence within the field of pediatric psychology. References may be sent to Dr. Celia Lescano [lescano@bcs.usf.edu].
